

An Internet payment service that allows your merchants to process credit card payments using their secure web site.

Western States Card Services offers an Internet commerce solution for WSCS clients through the YourPaySM payment gateway.

An Internet payment service that gives merchants the ability to process multiple transaction types over a secure Internet connection, YourPaySM is a flexible, efficient solution for your entire merchant base.

YourPaySM Processing Options

Regardless of the size of the merchant, YourPay provides three processing solutions that can meet their needs:

YourPay.com[®]

An online payment service that provides merchants with the equivalent of point-of-sale terminal computer software, without the hassle and expense of ongoing maintenance. Merchants simply log into **YourPay.com**, enter the payment and order data manually, then submit the sale for processing.

YourPay ConnectSM

Provides a simple solution for adding e-commerce payment functionality to an existing merchant web site. Your merchants can process fast and easy web payments complete with SSL security and fraud protection measures. Your merchants simply create an order form, copy and paste some HTML tags into place, and they're ready to accept payments.

"The Trusted Partner For Those We Serve"

You bring your customers...

YourPaySM provides the secure payment gateway

YourPay APISM

The tool for merchants who need a comprehensive custom e-commerce solution. Ideal for merchants with an existing e-commerce site, YourPaySM service application program interface (API) provides SSL security, fraud protection measures, and an automated Electronic Soft-goods Download (ESD) module. Also includes tax and shipping calculators.

Benefits to Your Merchants

- Multiple payment types supported
- Fraud protection
- Customizable reporting tools
- Reliable 24/7 processing gateway
- High security order processing
- Compatible with most shopping cart software
- E-mail confirmation to both the merchant and the customer
